

Pump up your profits

**Maximise return
on your leads
with X-debt's
3 new services:**

- Tailored IVA's
- Debt Management
- Corporate Insolvency

Brokers use X-debt for maximum lead profitability because of our highly skilled staff to maximise IVA lead profits.

How? We spend time with each client to understand their entire financial situation personally, which means you have a much higher chance of each lead being successfully placed into an IVA.

You are losing money on IVA leads because IVA factories only process the simple ones (and abandon the rest!)

But now you can easily turn IVA leads into more profit with X-debt's 3-part solution:

Tailored IVA's: X-debt makes each lead fit into an IVA where at all possible by giving individual attention to each client.

Debt Management: If there really is no way for a lead to fit into an IVA we investigate a debt management plan. And we share the set up fee with you the introducer.

Corporate Insolvency: We also provide you with a full corporate insolvency service. With the growth in personal insolvency due to IVA factories, our corporate insolvency service can add a significant profit stream for you, simply by using X-debt.

Discover right now how X-debt helps you maximise profitability from every single IVA lead, and if need be, sharing the profit of Debt Management Program set up fees.

Get in touch today and speak to us about how easy it is to switch your IVA processor to X-debt and start benefiting from our Debt Management profit share and Corporate Insolvency services.

All you need do is call us with the question 'how easy is this, and how much better return will I get by using your service'?
